### 1 Vocabulary 1

by James Micken

Wow, this is entertaining. By the first paragraph we ended up with Ronald McDonald.

"In general, I think that security researchers have a problem with public relations."

"My point is that security people need to get their priorities straight."

You can't run from the Mossad.

"Security research is the continual process of discovering that your saace-ship is a deathtrap."

Sounds like Randall Munroe mixed with a conspiracy theorist.

### 1 Vocabulary

- PGP
- HMAC
- Security label
- Information flow control (IFC)
- taint explosion
